

PROFILE SUMMARY

Self-motivated B.Tech CSE final year student with a strong foundation in programming, algorithms, and software development, passionate about learning new technologies, solving challenging problems, and contributing to innovative projects. Thrive in team environments and enjoy applying my skills to real-world applications.

EDUCATION

B. tech(CSE)	Sharda University	7.0/10	2022-2026
Intermediate	L.K College	74%	2019-2021
10 th Grade	School Name	77%	2018-2019

INTERNSHIP

Graphhene Software Pvt. Ltd -Frontend Developer

(20th May,2024 – 19th June 2024)

- **Project-** E-Commerce Website
- **Tools/Technologies used:** MERN Stack (MongoDB, Express.js, React, Node.js), REST APIs, and responsive UI design.
- **Achievements/Improvements/Outcomes:** Improved user experience with a responsive interface and real-time updates; successfully integrated payment gateway and CRUD operations for products.
- **Any recognition or pre-placement offers:** Project selected as a key part of final-year submission, showcasing full-stack development skills.

PROJECTS

1.Deepfake Detection- Course Project

(August-2024 – December-2024)

- Developed a machine learning model to identify AI-generated deepfake content, applying techniques in data preprocessing, feature extraction, and model training to achieve accurate detection results.
- Tools/Concepts/Technologies used:- Python, Machine Learning, OpenCV, TensorFlow
- Key takeaway or application :- Gained hands-on experience in data preprocessing, feature extraction, and model training

2.Stock Market Data Analysis

- The project provides valuable insights into market behavior, highlights factors affecting stock performance, and demonstrates how data-driven approaches can help in portfolio optimization and decision-making.
- Tools/Concepts/Technologies used:- Python, pandas, numpy, matplotlib, Machine learning and Deep Learning Framework, LSTM
- Key takeaway or application :- Applied feature engineering, data preprocessing, and hyperparameter tuning

3.Zerodha Clone-Web Development

- Developed a full-stack trading platform with a responsive dashboard showing live stock data. Built backend for user login, transactions, and real-time updates, and used MongoDB to store user and trading data efficiently
- Tools/Concepts/Technologies used:- HTML, CSS, JavaScript, React (Frontend); Node.js, Express.js (Backend); MongoDB (Database); Real-time data handling, User authentication.
- Key takeaway or application :- Hands-on experience in full-stack development with real-time data and secure authentication for trading platforms.

SKILLS

Programming: - Java,Python

App Development: - HTML, CSS, JavaScript, Bootstrap

DataBase: - SQL, MongoDB

Tools: - Git, GitHub

Concepts: - Object-Oriented Programming, Data Structures & Algorithms , Computer Network, DBMS

Soft Skills: - Problem Solving, Teamwork, Communication, Adaptability

CERTIFICATIONS

- DSA (In java) Certificate-Apna College
- Web Development Intern-Graphhene
- Databases Foundation-Oracle

ACHIEVEMENTS

Practiced and solved 150+ DSA problems, strengthening problem-solving skills, algorithmic thinking, and coding proficiency in java.
